# EPRA Net Asset Value

## Monthly Bulletin

Net Reinstatement Value

Net Tangible Assets

Net Disposal Value

March 2024

Premiums / Discounts have been calculated as:  $(\text{Share price} / \text{Average NAV per share}) - 1$

Average NAV per share is calculated as the simple average of the 3 EPRA NAV Metrics as specified in the EPRA BPR 2019 Guidelines\*:

- 1) EPRA Net Reinstatement Value (NRV)
- 2) EPRA Net Tangible Assets (NTA)
- 3) EPRA Net Disposal Value (NDV)

\* The methodology for computing each of the EPRA NAV Metrics is available on EPRA Website: <https://www.epra.com/finance/financial-reporting/guidelines>

The 3 EPRA NAV metrics per share are taken from company reports. NO adjustments have been made.  
When not available, the NAV per share has been calculated as:  $\text{Total Assets} - \text{Total Liabilities} / \text{number of shares outstanding}$ .

Discounts have been calculated for EPRA Index constituent for their respective inclusion times. Minus constituents of which no data was available.  
Reasons for non-availability are: Property values stated at historical costs and not market or fair value, or historic data could not be found.

New NAV data will replace old NAV data for the months following the previous latest published NAV data.

Share prices are month-end closing prices.

Aggregates have been calculated on a NAV-based weighting.

Methodology for computing Premiums / Discounts based using the simple average of the new 3 EPRA NAV metrics (NRV, NTA, NRV) has been implemented in Mar/21. Before to Mar/21, all the computations were performed using the EPRA NAV per share instead of the simple average of the 3 metrics.

As-of January 2012, the historical NAVs and Discount to NAVs are also being calculated using interpolated company NAV data. Previously, the imbalance between reporting dates (annually, biannually or quarterly) and share prices (monthly for this report) led to more volatile NAV performance graphs.
