\*\*Latest available GDP data as of 2020-end

Based on the [Index Ground Rules](#), the nationality of the company is determined by its underlying EBITDA exposure. In most cases, FTSE EPRA Nareit Index constituent nationality will follow that of FTSE GEIS ([Determining Nationality](#)). In cases where a company is listed in a Developed market, but derives the majority of its EBITDA from Emerging markets, it would be included in the FTSE EPRA Nareit Emerging Index. REIT status assessment is done separately, and depends on the recognised REIT legislation which must be in operation in the country in which the constituent is domiciled. Therefore, the table above includes companies that are classified as REITs in their country of domicile, but do not necessarily have a REIT status in the country of their index nationality.

# Size of the total commercial real estate market - Methodology

## Size of the total real estate market

We estimate the size of individual country commercial real estate markets using a Gross Domestic Product (GDP) top down approach, and aggregate their values to arrive at a global estimate. Of course, individual countries are in varying stages of development, therefore, we must adjust country estimates to account for the economic situation based on the FTSE Country Classification.

With regard to the sample, we selected 48 countries from four separate regions: Asia-Pacific, EMEA, Latin America, and North America, based on the eligible markets for the FTSE EPRA Nareit Global Real Estate Indexes. We also added the countries from large political and economical regions (EU, Eurozone, OECD, and G7) giving a total of 59 countries that are tracked in this report. In developed countries high quality commercial real estate represents approximately 45 percent of GDP. In emerging countries, this figure is lower.

We based our estimates on a formula devised by Prudential Real Estate Investors, as published in "A Bird's Eye View of Global Real Estate Markets: Update February 2012" – Prudential Real Estate Investors (PGIM Real Estate), Paul Fiorilla, Manidipa Kapas, and Youguo Liang, February 2012.

- ▶ For developed markets 45% of GDP is used
- ▶ For Hong Kong and Singapore the 45% of GDP is adjusted upwards by 100%
- ▶ For the United Kingdom and four of the GCC countries (Bahrain, Kuwait, Qatar, and the United Arab Emirates the 45% of GDP is adjusted upwards by 25%
- ▶ For emerging markets further adjustments are made based upon the following formulas:

For developed countries: **REi = GDPi x 0.45**

For emerging countries: **REi = GDPi x 0.45 (GDHi / GDP Adj. for inflation)<sup>(1/3)</sup>**

Where: **REi** = Country high-quality commercial real estate value

**GDPi** = Country Gross Domestic Product

**GDHi** = Country Gross Domestic Product per capita

**GDP Adj. for inflation** = USD 20,000 for the year 2000 adjusted annually on the US inflation rate

The GDP numbers, and hence the total value of real estate is updated when the Organisation for Economic Co-operation and Development (OECD) publishes new GDP figures. **GDPi** within the **REi** formula is calculated on a weighted basis where the latest available GDP value has a weighting of 40% ('t'), t-1 has a weighting of 30%, t-2 has a weighting of 20%, and t-3 has a weighting of 10%. The weighted value for **GDPi** dampens the effects of GDP and currency inflation on the **REi** value.

## Size of the listed real estate market

The calculation of the size of the total listed real estate market is based on the Industry Classification Benchmark (ICB) system provided by FTSE. Similar to the FTSE EPRA Nareit Global Real Estate Indexes, the starting point is defined by the index Ground Rules (latest update June 2021). The Initial Universe of companies consists of companies with the following ICB Classifications: **Sector 8670 (REITs, New ICB Sector 351020)** and **Subsector 8633 (Real Estate Holdings and Developers, New ICB Subsector 35101010)** within Supersector 8600 (Real Estate) (New ICB Real Estate Industry 35). The universe may also include companies with a New ICB Subsector of 30204000 (Closed End Investments) if the majority of revenue is derived from Real Estate activities.

We remove the following irrelevant subsectors: 8637 (Real Estate Services) (New ICB Subsector 35101015), 8676 (Mortgage REITs) (New ICB Sector 302030), and 3728 (Home Construction) (New ICB Subsector 40202010).

To derive the value of the real estate markets, full market caps of the listed companies are used.
